---

Hello all, just trying to get this site up and running - finally!

The aim of the site is to help people to help themselves with computer viruses. We prefer to be in a preventative role rather than a fixing role. We are trying to encourage people to keep things like anti-virus and windows patches up to date in order to protect their PC,s, laptops etc.

We will also try and highlight some good sites for:

- Free Software
- Latest bargains etc.

We also offer the following services:

- Virus Removal
- Printer set-up
- Wireless/broadband set-up
- Hardware and Software Upgrades
- Smart Phone Configuration

**No fix no fee policy!**
